Judge Lindeman, of Cincinnati, sentenced a little boy to two years' imprisonment for stealing a newspaper from a doorman. The lad's mother was there by made insane, and the magistrate is the object of popular indignation.

The ancient kingdom of Poland is now for all purposes an integral part of the Russian empire, the last remaining vestige of its semi-autonomous character having been swept away through the recent abolition of the office of secretary of state for Poland.

The czar Alexander receives, in round numbers, \$25,000 a day income, the Turkish sultan, \$18,000; the emperor of Austria, \$10,000; the emperor of Germany, \$8,200; the king of Italy, \$6,340; the queen of England, \$4,700; the king of the Belgians, \$1,643; and the president of the French republic, \$500.

A lady (the Countess Hadick) has been received in Hungary after Freemasons. The grand orient of Hungary declares the election null and void. But then comes in the maxim, "once a mason, always a mason." Masonic cates are asking, "what is to be done—how long will the masonic secret be kept now?"

Old Catholics in Europe are still hammering away at the question of marriage for their priesthood. They have recently held a congress at Breslau, at which it was decided to make a declaration as to whether any clerical existed on the part of the state to the abolition of clerical celibacy, and to take a vote of priests—Old Catholics and congregations on the subject.

The new Thames tunnel is chiefly intended for the use of laboring men who have to cross the river at that point, and are often detained by fogs and the consequent stoppage of the boats. It will be for pedestrians only, will be lighted with gas and thoroughly ventilated, and when finished will be a circular tube of nine feet in diameter. There are in all about eight thousand workmen who cross in that vicinity.

It is said that, according to calculations recently made, the English coal mines are good for eight centuries to come. Mr. Grimes calculated that the maximum output of the mines for all time is \$220,000,000 tons. It has not reached 120,000,000, and he assumes that there is enough to last the above length of time, which may remove a great weight from the minds of some people, who wonder where their coal was coming from for next winter.

A new drink to take the place of gruel or barley water is recommended by the Times of India—"zongee water," or the liquor in which rice has been boiled. This drink has three excellent qualities:—It becomes impregnated with the properties of the rice, boiled in it, it satisfies hunger; it quenches thirst, and is a capital draught in fever attacks, and lastly, when taken warm in bed, "zongee" is good for cold and influenza.

The miraculous draught of fishes in the Columbia river has practically remained the same for many years, and within the last eight years a cannery industry has sprung up on its banks, which last year cured and baled 16,000,000 pounds for exportation. The London Times estimates that the catch of Great Britain and Ireland for 1875 was 9,000,000 pounds, according to that calculation the produce of one Oregon river is equal to nearly four times the catch of the whole United Kingdom.

Mr. Orton, president of the Western Union telegraph company, says that Chicago gives as much trouble as London. The company as Philadelphia and Boston combined, and that before the close of the present century Chicago will be the second city on this continent. Speaking in the first person, Mr. Orton says: "Neither St. Louis nor Cincinnati understand the use of the telegraph business like the Chicago people. I look with a sanguine mind on the prospects of Chicago, St. Paul, and I will add, Denver, Colorado. Denver, although a small place, has a vigorous business spirit, and seems to me to be the *entrepreneur* for all the Rocky Mountain states, herds, and agriculture. I regard Denver as one of the future very large cities."

VIENNA correspondence supplies the following information relative to German currency movements: At the end of August, the old silver coins withdrawn amounted to 561,411,210 marks, the old copper coins to 2,960,783 marks. On the thirtieth of September the returns of all the nineteen German note banks were as follows: Coin and bullion, 735,395,000 marks (decreased 21,395,000 marks); banknotes, 1,121,270,820 marks (increased 8,972,000 marks); circulation of notes, 892,675,000 (increased 8,972,000 marks). The total new German money coined up to September 31, 1876, amounted to:

In gold.....	1,421,270,820 marks
In silver.....	1,121,270,820 marks
In bullion.....	1,121,270,820 marks
In copper.....	913,358 marks

CARTRIDGE WHEELS are the subject of a controversy between the Swiss railroad. One company has recently begun to use them under its freight cars; the other refuses to permit cars with such wheels to pass over its line, condemning them as unsafe, to the great disadvantage of through traffic from the connecting road. An appeal was made to the Swiss railroad department, and that body has referred it to the council of the confederation. In the arguments made so far we have seen no mention of the fact that cast iron wheels are used almost exclusively for passenger as well as freight trains, on seventy-five thousand miles of American railroad, and that accidents from wheel breakage are decidedly rare.

A colored man in Virginia was walking one morning before breakfast, and discovered a fawn lying asleep near a spring. Softly approaching he seized it, and hoisting it on his shoulder, started for home. But the fawn set upon a pitious bellowing, and the tables were very unexpectedly turned by the appearance of a very formidable buck followed by a doe, the first of which charged to the rescue so suddenly that he was abstracting a portion of the colored gentleman's coat as he was tumblingly ascended a tree. Then the enraged animal watched for two hours under that tree, but at the end of that time went away, and the man descended safely and skipped homeward.

CHILDREN.

Come to me, my children,
For I have a story to tell,
And the questions that you ask
I will answer quite well.

Ye have the golden windows,
That look toward the sun,
Where thoughts are free and airy,
And the blessed morning runs.

In your hearts the birds and the flowers,
That sing and bloom and grow,
But in mine the golden windows,
That look toward the sun.

What shall I do, my children,
That I may be like you,
And the golden windows,
That look toward the sun.

What shall I do, my children,
That I may be like you,
And the golden windows,
That look toward the sun.

What shall I do, my children,
That I may be like you,
And the golden windows,
That look toward the sun.

What shall I do, my children,
That I may be like you,
And the golden windows,
That look toward the sun.

All smiling and beaming when he met a friend, who innocently inquired why I looked so radiant.

"Why, I've just had an interview with the most charming little comeliness in town."

"How much has she swindled you out of?"

"Two cents!" cried Philip, with a very laugh, and then related his adventure.

"By the way," said Randall, "shall I send you at my aunt's tonight? I've promised to dine there."

"I don't know," said Philip, "I am not sure I shall go."

"Why not?" asked Randall.

"I don't know," said Philip, "I am not sure I shall go."

dis-respect of asking permission only to go to the face of a friend. Say you for give me, mamma."

"You are a wicked, head-strong girl, and hope you won't live to repent it. As for you, Miss Maylie, I beg your pardon. I'm sure I don't care who has him—just as well you as any one. So take him, and be happy!"

"Thank you, mamma," said Miss Maylie.

"The permission was not very gracious, but Philip's 'little comeliness' was greatly for small favors."

A MATERIAL HOME.

Take a sheet of stiff white paper, and apply it to the right eye, and look steadily through it, focusing the eye on any convenient object; keep the left eye open. Now place the left hand palm upward, against the side of the paper tube, and about an inch or two above its lower end. The action of the eye will be produced by a hole in the center of the side of the tube, made through the left hand. This is the hole in which we propose to make a material home, and it would be inconvenient to make it in the left hand, for a sheet of white paper is not so easily cut as a sheet of black paper.

FASHION CORNER.

Velvet cloaks are being revived. Shout-broths of tealwood wool. Fish-scale brocade is very fashionable. Basket ribbons still continues in favor. Soft skin turbans will be worn this winter.

Myrtle is the shade of dark green most in vogue.

Velvet dress skirts will be very fashionable both for street and mill dress.

Leaves of dark green, cardinal red, and brown, without any flowers are seen.

thousands of years after solidification commenced—surface portions of the melted material losing heat, freezing and sinking immediately, or growing to the thickness of a few meters where the surface would be cool, and the whole solidifying.

This is a striking picture of the growth of the "round earth," which was once supposed to have been made from the first "fast" that it could not be moved.

HURRA FOR THE UNION!
Boone's Majority from 1,500 to 2,000.
The People are the "Ring."
The scattering returns from this Congressional District from reliable, though unofficial sources, indicate with certainty the reelection of the Hon. Andrew R. Boone, by a majority ranging from 1,500 to 2,000.
The county of Fulton gives Boone a majority of 361.
Hickman yesterday, gives Boone 643 majority.
Graves, Judge Boone's home county, gives him over 1,000 majority.
Callaway gives Turner 1,022, and Boone 517. Turner's majority 505. Two years ago Turner's majority was 373. Houston received 142 votes in Callaway.
The vote at the Bladwell precinct was a tie between Boone and Turner, which we understand is a Boone gain.
The news here gives Boone increased majorities in the counties of Caldwell, Lyon, Crittenden, and about a stand off in Livingston.
The counties of Trigg, Callaway, Marshall, and Ballard, are only marginally reported at this date, owing to want of facilities, but give Turner heavy majorities—probably not up to his vote two years ago.

TILDEN'S ELECTION.
The Result and Its Meaning.
The election of Sam'l J. Tilden to the Presidency of the United States renewed properly to the whole country, and peace, reconciliation and fraternity to the whole people. It means a cleaning out of official corruption and an honest administration of the affairs of the government. It means a restoration of the policies of the government to the principles of the constitution and the honored tradition of our revolutionary sires.
The Southern people will accept the extended hand of Mr. Tilden as the earnest of a common national brotherhood, and can salute the "old flag" with the pride of other days, no longer feeling themselves held as aliens or enemies. We are at home in the house of our fathers. With common pride we can battle for its sacred folds, claim its protection, or defend it when assailed by foreign or domestic foes. With renewed pride we can renew energy, industry, hope, ambition. The Northern people will learn that we are not a race of Klaxul assassins, hating them or our country, murdering negroes, or secretly plotting treason and waiting an opportunity to march on our Southern brethren. The poor negro will learn that the Southern people are in truth their friends, and not denigrating for their replacement or to deprive them of any civil or political rights, as has been charged against us. The Northern people will also learn that the rebel claim business" was the miserable lying of sinking Radical republicanism. In six months the honest names of the Republican party will earn the Tilden election as a blessing to them and to the whole people. The inauguration of Tilden and Hendricks will be the harbinger of peace on earth and good will to all mankind.

The Democratic will still have a working majority in Congress, though considerably reduced.
RAILROAD TO NEW MADRID, MO.
From the following extract from the New Madrid Record, it will be seen that work has actually commenced on the Little River and Arkansas Railroad:
"Ground was broken on the eastern end of the line, with due formality, on Monday last, and a portion of the grading from Little River toward town has been done during the week. A small force is also engaged west of Little River, in the necessary preliminary work of clearing the road bed, and in the construction of the new bridge buildings for the accommodation of working gangs. The work of getting across the line is also in progress. We shall continue to unite, with deep interest the progress of the enterprise from week to week, hoping most sincerely that the season will be such as to expedite a speedy and gratifying consummation of it."

Centennial Buildings Doomed.
It appears that, even while the great edifice and its annexes are busy with the tramp of thousands of sight-seers, the thirty Board of Finance have already fixed upon November 30 as the day when the whole collection is to be used under the auctioneer's hammer. We do not suppose that this movement will, in any way, dash the zeal with which the citizens from all points of the compass are entering into the edifice of the colossal exhibition. It may, it is known, even intensify the interest with which, between this time and the closing day, they shall look upon so much that is priceless included in so much that is perishable.

A NOVEL MODE OF SEIZING.
A Scotch collier has been sentenced by leaving over a parcel of dynamite, which he then exploded with a match. The man's name was Duncan, and Nihilist was the scene of the occurrence. The man was blown in two, and a hole made in the street three feet deep by two and a half inches—big enough for a baby's grave. His motive appeared to have been chagrine at ill-natured gossip, and perhaps a desire to connect his memory with some act which would fill his neighborhood rather with dread than contempt. Suicide often appears to be produced by the pity or the terror of their end.—(London Spectator.)
